

The Right Mix

Our DSK Summer Camp is specially designed camp for curious makers to construct, tinker and engineer, with a strong focus on developing **soft skills** and **independence**.

In our intentionally set-up space, our makers will learn to manage their time, resources and ideas while having fun, working out ways to **solve problems** as they create exciting projects through *experimentation* and *discovery*.

We have added a linguistic component to our camp this year to provide a fun platform for creative expression.

Excursions

Field trips are included to provide campers a chance to extend their learning outside the classroom.

- Muji+ Creative Studio
- Kawasaki Good Times World
- Arima Toys and Automata Museum
- Takenaka Carpentry Tools Museum

Activities

Robotics and Coding

- Critical thinking
- Problem solving

Automata (moving automation)

- Mechanical reasoning
- Spatial cognition

Electronics and Circuits

- Logical thinking
- Troubleshooting skills

Woodworking Projects

- Collaboration
- Creativity/Innovation

Cardboard Construction

- Design thinking
- Construction skills

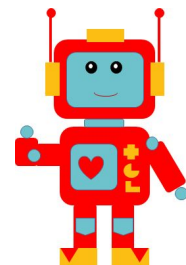

Roleplay and Puppetry

- Self confidence
- Presentation skills
